

Print this page and cut out the four markers along the dotted lines.

TIPS AND TRICKS:

For the most satisfying results, make sure you're in a well-lit area, and be sure to hold the marker so that it faces your webcam directly.

Be sure nothing covers the black area of the marker.

You may need to activate your webcam via your "Flash Player Settings." Right click in the blank video area, click "Settings" and then select the webcam icon. Choose USB video from the drop down.
